TTI COMBAT

CANiK and Taran Tactical Innovations proudly present the CANiK TTI Combat, a high-performance pistol built for champions. Developed on an all-new polymer frame designed by Taran Butler, the TTI Combat delivers elite-level features in a sleek, competition-ready package. Key highlights include aggressive grip texturing, a ported and fluted barrel, CANiK's first compensator, a diamond-cut flat-faced trigger with a crisp 90-degree break, a redesigned slide release, and an optics cut that supports low-profile mounting for MECANIK optics, Trijicon SRO®, and more. The pistol comes complete with a custom holster, a travel hard case, and a commemorative collaboration coin celebrating this enduring partnership. The TTI Combat is the ultimate fusion of CANiK precision and TTI performance — a truly superior firearm.

PRECISION MEETS POWER

Experience the pinnacle of handgun innovation with the CANiK TTI Combat, engineered in collaboration with Taran Tactical Innovations. This elite firearm features a performance-driven design including a patented quick-attach compensator, new helical fluted barrel, HIVIZ® fiber optic front sight, and aluminum flat trigger with a crisp 90° break. Enhanced with aggressive serrations, and an optic-ready slide cut, every component is built for speed, control, and precision—making it the ultimate choice for competitive shooters and tactical professionals alike.

COMPETITION SERIES

SFx RIVAL-S

Steel is forged by exposure to the most intense heat and the repeated impact at incredible force, the product of these trials is the strongest and most durable steel in the world. The fire does not consume the metal but rather makes it more flexible and powerful. The blows do not break the metal, instead it actually strengthens the core. Just like forged steel, CANiK has risen from the forge with strength, power, and flexibility in every area including its manufacturing and technological departments. It is with the knowledge of these trials that CANiK introduces the Rival-S, a firearm so forged that it is instantly ready to withstand every rival it is called upon to challenge.

SFX RIVAL

When it came to naming the CANIK competition gun, the real challenge was to come up with a name that described the target we had when creating the firearm. It wasn't easy, but the purpose is simple: to stand out from others with a superior advantage in shooting competitions to win! The name, which by itself is no doubt, was apparent: the "RIVAL".

COMPENSATOR

SFX RIVAL Compensator by 45 Blast

Unlock peak performance with this precision upgrade for your Canik SFX Rival. Built to reduce recoil, muzzle rise, and flash, it delivers faster, more accurate follow-up shots—no custom fitting needed. Crafted from durable machined aluminium, it's ideal for range days and competitive shooting.

CANIK TP9 SFX Compensator by 45 Blast

Upgrade your Canik TP9 SFX with a sleek, performance-driven compensator. Designed to reduce recoil by up to 80%, it delivers smoother handling and sharper accuracy. Built with trusted Canik quality and 45 Blast craftsmanship, it's a stylish boost for both function and form—perfect for range use and competitive shooting.

MECANIK red dot sights continue to redefine tactical applications, excelling in sportive shooting, home/self-defense, and competitive categories. We take immense pride in presenting you with the world's most efficient, reliable, and rugged electronic sighting system.

Welcome to an elite standard with MECANIK.

MECANIK® MO1 [Micro Reflex Sight]

- Factory Pre-Zeroed-Optimized for METE series pistols.
- 3 MOA Red Dot- Ideal for duty concealed carry handguns.
- Parallax-Free-Ensures precision aiming without optical distortion.
- Low-Profile Design-Enables co-witness capability with iron sights.
- Top-Load Battery Compartment-Allows battery changes without losing zero
- Automatic Brightness Adjustment-Adapts to ambient light with 10 brightness levels.
- Superior LED Technology-Provides a sharper and clearer dot compared to competitors.
- Motion Sensor-Extends battery life by powering off when idle and reactivating with motion.
